QLSA linear solve of the linearized XL-BOMD system, γ = 0.5
input: PySEQM AM1 densities from densities_iso17.npz
PySEQM XL-BOMD, k=6
paper, α=0.0
paper, α=0.5
$\kappa_{\mathrm{eff}} = \alpha_{\mathrm{BE}}/\sigma_{\min}$
QLSA degree (block-encoding queries)
$\|P_q - P_c\|_F/\|P_c\|_F$
surrogate vs SCF density (% rel. Frobenius)
